02

LEGS

Lower body, fully covered

A matched Impulse pair for knee extension and flexion, plus a plate-loaded sled that works as both a leg press and a hack squat.

LEGS · SELECTORISED

Leg Extension

IMPULSE · PIN-SELECT STACK

Quad isolation on a smooth cam.

The seat and backrest hold the hips still while the shin pad lifts on a cam-driven lever, so the quadriceps do all the work. Changing the load is one pin move in the stack.

TRAINS	Quadriceps
MOVES	Leg extension · single-leg extension

- Cam-driven lever with shin roller
- Seat with supportive backrest
- Exercise placard on the head frame

BUYER VALUE

The leg-day staple members queue for, from warm-ups to high-rep finishers.

LEGS · SELECTORISED

Seated Leg Curl

IMPULSE · PIN-SELECT STACK

Hamstring curls with the thighs held firm.

A padded thigh hold-down keeps the knees in line with the cam while the lower-leg pad sweeps down and back. Seated, supported and easy to learn, it pairs with the leg extension (No. 01).

TRAINS	Hamstrings, calves
MOVES	Seated leg curl · single-leg curl

- Padded thigh hold-down
- Large cam at the knee pivot
- Pin-select weight stack

BUYER VALUE

Completes the extension–curl pair every commercial floor needs.

LEGS · PLATE-LOADED

Leg Press with Hack Squat

IMPULSE · PLATE-LOADED SLED

Two heavy leg movements on one frame.

Train hack squats with the shoulders under padded yokes, or switch to leg presses on the same sled. The broad diamond-plate footplate leaves room for narrow and wide stances.

TRAINS	Quads, glutes, hamstrings, adductors
MOVES	Hack squat · leg press

- Padded shoulder yokes with grips
- Diamond-plate footplate
- Plate loading: no stack ceiling

BUYER VALUE

Two machines' worth of leg training in one footprint.

03

CHEST & SHOULDERS

Press, raise and fly

A foot-assisted chest press, an overhead shoulder press and a dual-function PlaMax station for pec fly and rear-delt work.

CHEST · SELECTORISED

Chest Press

IMPULSE · PIN-SELECT STACK

Guided pressing with a foot-assist start.

Curved press arms meet the hands at mid-chest in front of a tall back pad. A foot bar at the base pushes the handles forward to the start, so every set begins without straining the shoulders.

TRAINS	Chest, front shoulders, triceps
MOVES	Seated chest press

- Foot-assist bar for safe starts
- Curved press arms with grips
- Tall back pad and seat

BUYER VALUE

The first machine most members look for, safe for beginners.

SHOULDERS · SELECTORISED

Shoulder Press

IMPULSE · PIN-SELECT STACK

Overhead pressing on a set path.

Long lever arms carry the handles up on a fixed arc, so lifters press overhead without balancing a bar. The seat and back pad brace the torso for steady, controlled reps.

TRAINS	Shoulders, triceps, upper chest
MOVES	Seated shoulder press

- Long overhead press arms
- Supportive seat and back pad
- Pin-select weight stack

BUYER VALUE

Shoulder work without a spotter, at any load.

CHEST & BACK · DUAL FUNCTION

Pec Fly / Rear Delt

IMPULSE PLAMAX SERIES · PIN-SELECT STACK

Two exercises on one pair of arms.

Sit back against the pad for the pec fly, or face it for the rear-delt fly. The arms swing from an overhead pivot hub, and the placard on the PlaMax shroud shows both set-ups.

TRAINS	Chest, rear shoulders, upper back
MOVES	Pec fly · rear-delt fly

- Pec fly and rear delt in one
- Overhead pivot hub
- Instruction placard for both moves

BUYER VALUE

Front and back of the shoulders, one footprint.

04

BACK & ARMS

Pull, row and curl

A dual-function pulldown and row, a chest-supported row and a preacher curl cover every pulling pattern and the biceps.

BACK · DUAL FUNCTION

Lat Pulldown + Seated Row

IMPULSE · PIN-SELECT STACK

Vertical pulls and rows from one stack.

Lock in under the thigh rollers for pulldowns from the high pulley, then use the long seat for seated rows. One stack, two of the most-used back exercises.

TRAINS	Lats, mid-back, biceps, rear shoulders
MOVES	Lat pulldown · seated row

- High pulley arm
- Padded thigh hold-down rollers
- Long seat for rowing

BUYER VALUE

Two back stations in the floor space of one.

BACK · SELECTORISED

Seated Row

IMPULSE · PIN-SELECT STACK

Chest-supported rows, no lower-back strain.

A padded chest support takes the lower back out of the lift, so each rep goes to the lats and mid-back. Upright grips on a pivoting arm give a strong, natural pulling line.

TRAINS	Lats, mid-back, rear shoulders, biceps
MOVES	Seated row · single-arm row

- Padded chest support
- Pivoting arm with upright grips
- Pin-select weight stack

BUYER VALUE

Heavy back work that is safe for every member.

ARMS · SELECTORISED

Preacher Curl

IMPULSE · PIN-SELECT STACK

Strict curls with the upper arms locked in.

The angled preacher pad pins the upper arms, so the shoulders can't help. The curl lever moves around the elbow, keeping the biceps under tension from bottom to top.

TRAINS	Biceps, brachialis, forearms
MOVES	Preacher curl · single-arm curl

- Angled preacher pad
- Curl lever with grips
- Pin-select weight stack

BUYER VALUE

A dedicated arm station that keeps the free-weight area clear.

05

SMITH & CABLE

The two busiest stations

An Impulse Smith machine for guided barbell work and a dual-stack functional crossover for hundreds of cable movements.

FULL BODY · GUIDED BARBELL

Smith Machine

IMPULSE · GUIDED BAR

Guided barbell work, from squats to presses.

The bar rides on vertical guide rods and locks onto hooks along the slotted uprights, so lifters can rack it at any point in a rep. Squats, presses, lunges and shrugs all run on one frame, with plate storage built in.

TRAINS	Full body
MOVES	Squat · bench press · shoulder press · lunge · shrug

- Rack-anywhere safety slots
- Guided vertical bar path
- Built-in plate storage

BUYER VALUE

Heavy barbell training members can do alone, safely.

FULL BODY · CABLE STATION

Functional Cable Crossover

INDIAN BRAND · DUAL WEIGHT STACKS

Two adjustable pulleys and a chin-up bar.

Each side has its own weight stack and a pulley that slides up and down the column, so one station handles crossovers, rows, presses, curls and rotational core work. The top frame doubles as a chin-up bar.

TRAINS	Full body
MOVES	Cable crossover · face pull · cable row · woodchop · chin-up

- Dual weight stacks
- Height-adjustable pulleys
- Chin-up handles on the top frame

BUYER VALUE

The most versatile station on the floor.

06

CYBEX STATIONS

Two premium Cybex machines

A Cybex pec fly for the chest and a Cybex VR1 abdominal crunch for the core, both on enclosed weight stacks.

CHEST · SELECTORISED

Pec Fly

CYBEX · SHROUDED WEIGHT STACK

A premium Cybex chest fly.

Sit tall against the long back pad, take the padded grips and bring the arms together in front of the chest. Yellow pop-pins at the arm pivots handle set-up, and a padded foot bar gives a stable base.

TRAINS Chest, front shoulders

MOVES Seated pec fly

- Padded swing arms with grips
- Tall back pad and contoured seat
- Shrouded Cybex weight stack

BUYER VALUE

A second fly station, on a premium Cybex frame.

CORE · SELECTORISED

VR1 Abdominal Crunch

CYBEX VR1 · ENCLOSED WEIGHT STACK

Weighted crunches with the feet braced.

Members sit on the padded saddle seat with their feet braced, take the rope and crunch against the stack, loading the abs far beyond floor crunches. The weight stack runs inside the Cybex column.

TRAINS Abdominals

MOVES Seated cable crunch

- Rope handle on the cable
- Saddle seat, hip roller and foot pads
- Enclosed weight stack

BUYER VALUE

Progressive core training on a premium imported name.

07

LOWER BACK & STRETCHING

Posterior chain and mobility

An Impulse hyper extension for the lower back and glutes, and a dedicated Impulse stretch bench for warm-ups and cool-downs.

CORE · BENCH

Hyper Extension

IMPULSE · ADJUSTABLE

Back extensions for the posterior chain.

Set the hip pads to the lifter's height with the pop-pin, lock the ankles under the rollers and hinge on the angled frame. A knurled footplate and side grips make it easy to step on and off.

TRAINS	Lower back, glutes, hamstrings
MOVES	Back extension · glute-focused extension

- Height-adjustable hip pads
- Ankle rollers and knurled footplate
- Side grips for mounting

BUYER VALUE
Lower-back strength work most gyms underserve.

MOBILITY · BENCH

Stretch Bench

IMPULSE · STRETCHING STATION

A home base for warm-ups and cool-downs.

A seat, back pad, knee pads and ankle rollers on one frame give members stable positions to hold their stretches, with grips to pull against for a deeper reach.

TRAINS	Mobility: hamstrings, hips, back
MOVES	Hamstring · hip · back stretches

- Padded seat, back and knee supports
- Ankle rollers and grips
- Pop-pin adjustment

BUYER VALUE
A dedicated stretch zone members notice.

08

OLYMPIC LIFTING

Benches, bars and plates

Flat and incline Olympic benches, six Olympic bars in four lengths and about 200 kg of rubber plates: a complete pressing and barbell corner.

CHEST · OLYMPIC BENCHES

Olympic Flat + Incline Bench Press

IMPULSE · BAR UPRIGHTS ON BOTH

Flat and incline pressing, side by side.

Each bench has its own uprights to rack an Olympic bar, so members can press flat and incline at the same time. The incline bench sets the back pad at an angle for upper-chest work.

TRAINS	Chest, shoulders, triceps
MOVES	Flat bench press · incline bench press

- Two benches: flat and incline
- Bar uprights on each
- Ready for the bars (No. 18)

BUYER VALUE

The gym's signature lift, twice over.

FREE WEIGHTS · BARS

Olympic Bars

6 BARS · 7 FT × 3 · 6 FT · 5 FT · 4 FT

Six Olympic bars in four lengths.

Three full-length 7 ft bars for bench presses, deadlifts and rows, plus 6 ft, 5 ft and 4 ft bars for curls, shorter lifts and tighter spaces.

TRAINS	Full body
MOVES	Bench press · deadlift · row · curl

- 3 × 7 ft bars
- One each: 6 ft, 5 ft and 4 ft
- Fits the Olympic plates (No. 19)

BUYER VALUE

Enough bars to run both benches and the floor at once.

FREE WEIGHTS · PLATES

Olympic Rubber Plates

APPROX. 200 KG · TRI-GRIP RUBBER

About 200 kg of rubber Olympic plates.

Rubber-coated tri-grip plates in a range of sizes, for the Olympic bars, the leg press and the Smith machine. The cut-out grips make them easy to carry and load.

USE	Olympic bars · leg press / hack squat · Smith machine

- Approx. 200 kg in total
- Tri-grip cut-outs
- Rubber coating

BUYER VALUE

Loads every plate-loaded station from day one.

09

RACKS & STORAGE

A tidy free-weight floor

A Cybex dumbbell rack that comes loaded with its dumbbells, a two-shelf TKO rack and two Technogym plate stands.

STORAGE · FREE WEIGHTS

Dumbbell Rack + Dumbbells

CYBEX · DUMBBELLS INCLUDED

A long Cybex rack, loaded and ready.

A long rack keeps dumbbell pairs in order at an easy lifting height. It comes with the dumbbells shown, so the free-weight area is stocked from the first day.

USE Dumbbell storage and training

- Dumbbells included
- Long rack for full sets
- Cybex frame

BUYER VALUE
Storage and dumbbells in one line of the price.

STORAGE · FREE WEIGHTS

Dumbbell Rack

TKO · TWO FLAT SHELVES

Two flat shelves for dumbbells or kettlebells.

Two black shelves on silver end frames hold dumbbells, kettlebells or accessories off the floor, in easy reach of the benches.

USE Dumbbells · kettlebells · accessories

- Two flat shelves
- Silver TKO end frames
- Compact footprint

BUYER VALUE
Extra storage where the floor needs it.

STORAGE · PLATES

Plate Stands

TECHNOGYM · 2 UNITS

Two sculpted stands for the plate zone.

Grey Technogym stands with horns on each side keep the plates organised and off the floor, right beside the benches and the leg press.

USE Olympic plate storage

- 2 units
- Horns on both sides
- Technogym design

BUYER VALUE
A premium finish for the plate area.
